PROFESSIONAL SUMMARY

Analytical professional with hands-on experience in dashboard development, data analysis, and stakeholder reporting across business development, HR analytics, and healthcare risk domains. Proficient in SQL, Power BI, Tableau, and Excel, with a track record of turning complex datasets into KPI reporting and decision-support insights. Strong communicator experienced in cross-functional collaboration, requirements gathering, and translating data into business recommendations.

EDUCATION

MSc Business Analytics & Management Science (2024–2025) – Merit

University of Southampton, United Kingdom

- Dean's International Scholarship Awardee
- **Focus Areas:** Business Analytics, Business Intelligence, Data Visualisation, Decision Support Systems, Operations & Project Management
- **Dissertation:** A Business Analytics Approach for Identifying and Categorising Risks in Healthcare IT Projects

B.Tech Computer Science with Business Systems (2020–2024) – CGPA: 8.7/10

GITAM University, India

TECHNICAL AND PROFESSIONAL SKILLS

Data Analysis & Reporting: SQL, Microsoft Excel, Power BI, DAX measures, Tableau

Data and Business Analytics: Data Cleaning, Dashboard Development, Data Validation, KPI Reporting, Trend Analysis, Root Cause Analysis, Operational Reporting, Decision Support.

Business Analysis: Stakeholder Engagement, Requirements Gathering, Process Improvement, Business Problem Solving, Insight Communication

Tools & Technologies: Python, Microsoft 365, SharePoint, Jira, Visio, Confluence, Agile framework.

Soft Skills: Stakeholder Communication, Cross-functional Collaboration & Teamwork, Analytical & Critical Thinking, Presentation Skills, Active Listening, Time Management, Attention to Detail, Adaptability.

Languages: English (Fluent), Telugu (Native), Hindi (Fluent), German (Beginner)

PROFESSIONAL EXPERIENCE

Business Development Intern | ScarBluu

Aug 2022 – Nov 2022

- Analysed market and operational data to identify business opportunities and performance trends.
- Produced reports and presentations translating analytical findings into actionable business insights.
- Supported KPI monitoring and collaborated with cross-functional teams on business development initiatives.

HR Intern | That Happiness Project

Apr 2024 – July 2024

- Served as Core HR for the social media marketing team, supporting stakeholder communication and team coordination.
- Analysed campaign performance data and developed insights that contributed to a 25% increase in audience engagement.
- Managed website updates, reporting activities, and data validation to support programme effectiveness.

Student Coordinator | GITAM University

2022 – 2024

- Coordinated academic and student engagement activities involving 500+ participants across multiple events.
- Managed communication between students, faculty, and administration to support successful programme delivery of 10+ events.

- Collected and analysed participant feedback to support event planning and continuous improvement initiatives.

Graduation Assistant (Part-Time) | EVESS Group

- Supported graduation ceremonies and events involving large groups of students and guests.
- Coordinated attendee communications, registration processes, and operational logistics.
- Maintained accurate records and delivered high-quality customer service in a fast-paced environment.
- Collaborated with team members to ensure smooth event execution and stakeholder satisfaction.

ADDITIONAL EXPERIENCE

Co-Founder | The Fluffy Stop (University Venture Project)

2021 – 2024

- Conducted primary market research and customer surveys to validate a pet-tech business concept.
- Performed competitor analysis, market sizing, and user segmentation research.
- Developed the business model, value proposition, and go-to-market strategy.
- Collaborated with mentors through the GITAM Venture Development Centre on business and product development.

PROJECTS

A Business Analytics Approach for Identifying and Categorising Risks in Healthcare IT Projects

- Analysed 350+ healthcare IT project risk records and publications to identify recurring operational and transformation risks.
- Categorised risks using business analytics techniques to uncover patterns affecting project outcomes.
- Developed Power BI dashboards to visualise risk trends and support stakeholder decision-making.
- Provided recommendations to improve risk identification, monitoring, and mitigation practices.

Employee Retention Analysis

- Analysed employee workforce data using SQL and Power BI to identify key drivers of attrition.
- Developed interactive dashboards to visualise retention trends and support workforce planning decisions.

Cost Optimisation Model

- Designed a linear programming optimisation model to allocate 2,900+ students across multiple schools.
- Identified an allocation strategy with projected transportation costs of approximately £555k.
- Performed scenario and sensitivity analysis to support operational decision-making.

Retail Sales Performance Analysis

- Analysed 10,000+ sales transactions to identify revenue drivers and business performance trends.
- Developed dashboards tracking key KPIs including sales, profit, returns, and product performance.
- Identified underperforming areas and recommended improvement opportunities.

Healthcare Operations Analytics

- Applied ANOVA, hypothesis testing, and regression to investigate factors affecting hospital length of stay.
- Identified statistically significant differences between patients with and without comorbidities ($p = 0.0033$).
- Determined that each additional surgery was associated with approximately 17 additional hospital days.

Advanced Analytics & Predictive Modelling

- Developed machine learning models for sentiment analysis, achieving up to 98.6% classification accuracy.
- Built predictive models using graph analytics, achieving 91.7% test accuracy.
- Analysed 10 years of financial market data to evaluate investment and portfolio optimisation strategies.
